SUMMARY

A Full-Stack Web Developer and Researcher with hands-on experience building responsive web applications, civic tech platforms, and AI-driven systems. Proficient in React, Next.js, Python, and MongoDB. Passionate about clean UI/UX, open-source collaboration, and leveraging technology to improve public services and solve real-world problems.

EDUCATION

Mindanao State University - Iligan Institute of Technology, College of Computer Studies

Bachelor of Science in Computer Science, English

Relevant Coursework: Data Structures and Algorithms, Software Engineering, Information Management

PROFESSIONAL EXPERIENCE

On-the-Job Trainee | *Center for Digital Iligan, Innovation & Sustainability*

June 2025 – July 2025

- Designed and built the administrative dashboard for the CDIIS Online Inventory Management System.
- Implemented modular React components for tracking borrower records and visualizing dynamic status.
- Modernized the UI/UX to streamline administrative workflows and improve data accessibility.

LEADERSHIP & VOLUNTEER EXPERIENCE

Pioneer & Core Contributor | *BetterGov.ph*

September 2025 – Present

- Spearheaded the development of *betteriligancity.org*, providing citizens of Iligan City with transparent, accessible public information and improved digital services.
- Managed organizational open-source repositories by conducting code reviews, maintaining quality standards, and ensuring smooth deployments.
- Onboarded new volunteer developers, delegated tasks, and tracked issue assignments to drive continuous progress across various BetterLGU initiatives.

PROJECTS

Budget Buddy, *Personal Project*

April 2024 – Present

- Web app to help students plan monthly expenses. Built with React, SCSS. Backend with Node.js and MongoDB in development.
- Created a Node.js backend with RESTful APIs connected to a MongoDB database storing transaction data.
- Integrated product data contributed by users to display available items with up-to-date prices.

UniGear, *BSCS Class Project*

September 2024 – December 2024

- Collaborated closely with a team of frontend developers to create web features that aligned with the application goal of displaying products.
- Practiced Agile principles using Scrum, participating in sprints to ensure timely delivery of features.
- Implemented user roles, login functionality, and data validation for secure access and management.

SKILLS

Frontend Development: React, Next.js, HTML, CSS/SCSS, JavaScript, React Query v5, Responsive Web Design

Backend & Databases: Node.js, Python, Flask, MongoDB (Data Modeling, Schema Validation), MySQL,

Systems, DevOps & Self-Hosting: Linux System Administration (Fedora, CachyOS), Docker, Cloudflare Tunnels, Tailscale, GNU Stow, Bash Scripting, Neovim

Core Concepts: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Project Delegation, Open-Source Management, Agile/Scrum, RESTful APIs
